**Vision (Te Matakite)**
Healthy People. Excellent care.

**Mission (Te Whakatakanga)**
Enable us all to manage our health and wellbeing. Provide excellent care through smarter, innovative delivery

**Values**
**Theme “People at Heart” – Te iwi Ngakaunui**

- Give and earn respect - Whakamana
- Listen to me; talk to me – Whakarongo
- Fair play – Mauri Pai
- Growing the good – Whakapakari
- Stronger together – Kotahitanga

**Code of Conduct**
The Waikato DHB’s code of conduct incorporates the State Services standards of integrity and conduct and sets expectations relating to behaviour in the workplace.
**INDIVIDUAL ACCOUNTABILITIES**

- To deliver the accountabilities required of the House Officer including meeting the key performance indicators (KPIs) established annually with the line Manager.
- To adhere to professional requirements for development, and assume responsibility for personal development
- Awareness of personal limitations and consults with others and seeks advice when appropriate
- Take responsibility for the accuracy and completeness of reports, patient notes and other official documentation as required.
- Identify any learning needs and discuss appropriate education and training with the Clinical Supervisor or Pre-Vocational/Education Supervisor.
- Participate in own performance review quarterly
- Ethical standards and codes of conduct are complied with.
- Orientate, coach and provide feedback to year one House Officers
- Complete rotation performance reviews biannually
- Regularly attend House Officer and departmental training and education sessions
- Meet training obligations in a timely fashion.
- Ensure that all other additional duties are performed in an efficient manner, within a negotiated timeframe
- Supervision is a condition of registration for all new doctors in New Zealand
- Domains of competence
  - Clinical expertise
  - Communication
  - Collaboration
  - Management
  - Scholarship
  - Professionalism

**TEAM RESPONSIBILITIES**

**Quality and Patient Safety collective responsibilities**
- Be responsible for treating patients / service users with respect, dignity and compassion
- Be responsible to the line manager for the provision of quality services; quality improvement is part of this and a fundamental duty of all staff, whatever their grade, role, service or base
- Comply with DHB policies and procedures to ensure delivery of good quality care reporting risks to quality and safety to their line manager
- Identify areas for improvement in their day to day work and to act upon these when appropriate and/or bring these to the attention of their line manager, in order that appropriate action may be taken.
- Participate in on-going quality improvement activities throughout the year within their team, service, site or department.
- Raise concerns with their line manager, if there are quality or patient / service safety issues in their area
ORGANISATIONAL RESPONSIBILITIES

- Aligns with the Waikato DHB strategy.
- Being accountable for own work and provide a high quality service, and contributes to quality improvement and risk minimisation activities.
- Read and understand the organisations policies and procedures that have an impact on the role and maintaining understanding is based on the most current version. This includes but is not limited to Corporate Records Management policy, privacy, and information security policies.
- Follows established Health and Safety and other policies and procedures to ensure the safety of oneself and others
- Work in partnership with Māori patients and whānau to provide culturally responsive and appropriate care and support to improve health experience, outcomes and reduce health inequities.
- Knows department emergency response plan and participates in response as applicable to the role.

QUALIFICATIONS AND EXPERIENCE

Qualifications

- Registered Medical Practitioner (recognised by the New Zealand Medical Council – MCNZ), preferably from a New Zealand medical school
- A current practising certificate with one of the following Scopes of Practice: Current Advanced Cardiac Life Support certificate

Desirable

- Previous work within the New Zealand health system.

Other requirements

- To work on call and after hours rosters.
- New Zealand full driver’s license and the ability to drive to rural hospitals and clinics and, if required to stay overnight outside of Hamilton.

Health leadership capabilities and competencies – staff, no delegation. Waikato DHB values are included as a drop down with competency (22)

| Achieving results (national leadership framework leading care) |
Health leadership capabilities and competencies – staff, no delegation. Waikato DHB values are included as a drop down with competency (22)

- Is open to learning new things and picks up technical skills in a reasonable timeframe (61)
- Is action oriented and undertakes duties with professionalism and enthusiasm (1)

Leading change (national leadership framework mobilise system improvements)

- Looks for opportunities to improve processes and uses logic and analysis to review information in order to make sound decisions (14)

The numbers in brackets are only applicable to current staff who have a career and development plan.

**SCOPE OF POSITION**

**Relationships**

**Internal**
- Service/ department team
- Specialist Medical Staff,
- Managers of Units
- Hospital and community based healthcare workers
- Appropriate / designated HR Practitioners
- RMO Unit
- Director of Clinical Training
- Healthcare consumers

**External**
- General Practitioners
- New Zealand Medical Council
- Primary Health Providers

**WORK ENVIRONMENT AND WORK FUNCTION / ACTIVITY**

**Work environment:**
- Works indoors in hospital wards, operating theatres, clinics and offices within hospitals, and specialist clinics
- Works in adequately lit, heated, ventilated and clean, well maintained and sterile workspaces with special lighting and equipment in operating theatres relevant to the surgical speciality.
- Works with blood and possibly contaminated items.

**Work function/activity:**
- Sedentary to light physical demand.
- Sits during consultations and when writing patient notes.
- Frequently stands for long periods of time to conduct surgical procedures.
- Walks frequently to check and prepare equipment, examine patients, case notes and medical images.
- Lifting, stretching and reaching is not a significant component of the job but may be required for some surgical procedures and when undertaking physical examinations.
- Repetitive hand and finger movements will be required for some surgical procedures and when using a computer or writing.
- There will be frequent use of surgical and medical equipment and materials including medicines, operating tables, computers, monitoring screens, medical dressings, surgical equipment, instruments, surgical clothing, sterilising materials and other medical equipment.
Mental skills necessary include a high level of cognitive functioning with medical, surgical, assessment, diagnostic, communication, interpersonal, organisational, problem solving and decision-making capabilities. Source: www.acc.co.nz

DECLARATION

I certify that I have read this position description and reasonably believe that I understand the requirements of the position. I understand that:

a) this position description may be amended by the employer following reasonable notice to me
b) I may be asked to perform other duties as reasonably required by the employer in accordance with the conditions of the position.

Manager’s signature: .............................................................................................................

Date of signing: ......................................................................................................................
SECTION B – DESCRIPTION OF CLINICAL ATTACHMENT – HOUSE OFFICER, PAEDIATRICS

JOB TITLE: HOUSE OFFICER

DEPARTMENT: Children’s Services - WaiKids

REPORTS TO: Clinical Director, Paediatric Medicine – WaiKids

KEY RELATIONSHIPS WITH:

- Patients / clients
- Specialist medical staff and clinical unit leader for clinical and professional matters
- Unit manager
- Hospital and community health care workers
- Clinical unit administrators - for administrative matters
- Prevocational Education Supervisor
- Clinical Training Director
- RMO Unit staff

PRIMARY OBJECTIVE:

The house officer manages patients within the child health service commensurate with and appropriate to their skill level

CLINICAL ATTACHMENT:

Approved for the Diploma of Paediatrics and Diploma of Child Health Recognised and as a Category ‘C’ clinical attachment by the NZ Medical Council.

[PLEASE NOTE: this categorisation refers to the level of supervision provided to the registrar - this is NOT the pay category for this clinical attachment]

Approved for the Diploma of Paediatrics and Diploma of Child Health Recognised and as a Category “C” run by the Medical Council of New Zealand (MCNZ)

[PLEASE NOTE: this categorisation refers to the level of supervision provided to the registrar - this is NOT the pay category for this clinical attachment]

KEY TASK PERFORMANCE STANDARD

CLINICAL DUTIES:

Be responsible to the team consultant/registrar and/or admitting consultant/registrar for the clerking of admissions, investigative procedures, changes in treatment and other similar matters.

- See assigned patients on a daily basis (Monday-Friday).
- Attend scheduled ward rounds and review the status and treatment of patients.
- House Officers work under delegated responsibilities to the supervising ‘on call’ consultant – “Senior Medical Officer (SMO) and Resident Medical Officers (RMOs) Responsibilities and the Limits of Delegation of Responsibilities to RMOs” [see Appendix 1]

Prepared / Reviewed: January 2017
Implement treatment of assigned patients, including ordering investigations and monitoring results under supervision of Registrar.

Perform required procedures as directed by registrars or Consultant.

Communicate with patients and their families about patient's illness and treatment.

Ensure clear communication with nursing staff for changes or updates in medical orders.

Foster a team environment with other medical and nursing staff.

Attend outpatient clinics as directed.

Appropriate laboratory tests will be requested and results sighted and signed.

Unless rostered for acute admitting or required for a medical emergency, the RMO shall be given the opportunity to attend:

- **Grand Round** and teaching session each Thursday from 1230-1330hrs.
- **Paediatric Radiology Conference** each Monday from 1130-1230hrs.

**ADMINISTRATION:**

A discharge summary is to be completed on iSOFT, with a copy given to the patient at discharge and copies sent to their general practitioner and others as requested by the admitting team.

Ensure clinical outcomes, management and revenue information is updated for infants that you examine or discharge through data-entry of the PIMS data.

Assist with the quality improvement program and make known concerns about any areas of practise.

Legible notes will be written in patient charts on admission, daily on weekdays and whenever management changes are made. Weekend plans should be documented on Friday.

**EDUCATION:**

**Paediatric Journal Club:** Mondays 1230-1330hrs (BEC)

**Paediatric Teaching Session:** Wednesdays 1230-1330hrs. (Topics based on those needed for diploma) – L9 ERB.

**Paediatric Surgery Education Programme** – Tuesdays 1215-1315hrs.

**Paediatric Medicine Education Programme** – Fridays 1100-1200hrs (Topics for talks are cases selected by the team responsible for the session) – L9 ERB

House officer teaching programme - Wednesdays, 1330-1430hrs. It is expected that work be planned around these and that other team members cover for these sessions.
ASSESSMENT:

FOR INTERNS WHO HAVE GRADUATED FROM A NEW ZEALAND MEDICAL SCHOOL OR NZREX DOCTORS

Interns must work in accredited clinical attachments under the supervision of a prevocational educational supervisor (PES). Prevocational medical training requires the Waikato DHB to deliver a 2-year intern training programme with specific requirements for postgraduate year 1 (PGY1 house officers) and postgraduate year 2 (PGY2 house officers).

– this requires that the house officers record their learning, have their progress tracked, create and update their ‘Professional Development Plan’ (PDP), record ‘continued professional development’ (CPD) activities plus complete their

Year two interns are required to establish an acceptable PDP for PGY2, to be completed during PGY2. The PDP will be reviewed and endorsed as appropriate by the advisory panel at the time they consider recommending registration in a general scope of practice.

When an intern is approved registration in a general scope of practice an endorsement related to completing a PDP will be included on their practising certificate for the PGY2 year, under the competence provision of the HPCAA.

At the end of PGY2, interns must demonstrate through the information in their ePort that they have met the prevocational training requirements and achieved their PDP goals. The prevocational educational supervisor will then recommend the intern’s endorsement be removed from their practising certificate as part of the practising certificate renewal process.

Year two house officers will meet with their educational supervisor at the beginning of the year and after each clinical attachment and will meet with their clinical supervisor on the clinical attachment at the beginning, mid-way through and at the end of the clinical attachment. It is important that the quarterly assessments are completed within two weeks of finishing a clinical attachment.

It is the individual house officer’s responsibility to meet all ‘ePort’ assessment deadlines and to have completed all documentation to allow both their clinical supervisor(s) and PES sufficient time to fulfil their assessment and reporting duties in the e-portfolio system

FOR HOUSE OFFICERS WHO HAVE NOT GRADUATED FROM A NEW ZEALAND MEDICAL SCHOOL

The house officer is to meet with their run supervisor at start of the run to identify goals and discuss responsibilities.

Performance is assessed by the designated supervising consultant the house officer is working for. All house officers who are registered under the general scope of practice and who are not on a vocational training programme will be required to join the “bpac” Recertification Programme at recertification time [when their Practising Certificate is due for renewal]; through this programme they will be required to complete:
• a Professional Development Plan (it is understood that a ‘Career Development Plan’ would fulfill the same function)
• 20 hours of medication education
• 10 hours of peer review
• a clinical audit
• the required number of meetings with the nominated collegial relationship provider (six in the first year and four in subsequent years)

Please note that if any deficiencies are identified during the run, the supervising consultant will discuss these with the house officer at the time (preferably no later than two thirds of the way through the run), and make a plan to correct or improve performance.

The Health Workforce New Zealand (HWNZ) and the Resident Doctor’s’ Association (RDA) have worked together to produce career planning forms (CDPF) and Vocational Career Design guidelines. A supervision report form is required to be completed at the end of each clinical attachment:

Waikato DHB has developed a document to help the house officer determine their career plans and options:

It is the individual house officer’s responsibility to maintain and complete these assessment and reporting requirements in a timely manner and on three-monthly basis

ROSTER - HOURS OF WORK:

Ordinary hours -
Monday to Friday 0800 – 1630hrs (excluding Public Holidays) covering wards, acutes and neonates

Afternoon duties:
Monday – Friday: 1400-2230hrs ‘on duty’
(The House Officers may be rostered to work 10 afternoon day shifts in an eight week roster)

After Hours - Weekends
Saturday – Sunday: 0800-2230hrs ‘on duty’
Two house officers are rostered on duty each weekend and this includes covering paediatric medicine and surgery wards, admissions and ward referrals plus cover for newborn unit and delivery suite.
(The House Officers may be rostered to work 2 weekends in an 8 week period)

After Hours - Nights
Monday-Sunday: 2200-0830hrs on duty
(The House Officers may be rostered to work one set of 7 nights in an eight week roster; the night duties have been rostered against a 4/3 split nights template)

(The paediatrics roster requires two House Officers to work in a reliever role – these positions may be filled by two House Officers for the entire run or may be shared amongst a number of house officers. The House Officers working in the reliever role are to be paid two categories above the run category, in accordance with the NZRDA DHB MECA. In this instance the reliever would be paid at:}
Category A

The reliever is required to report for duty each day and is required to cover sick leave and planned annual leave. The reliever may be rostered to work normal duties, afternoon duties and weekends.

SALARY:

a) An ‘additional duties’ sheet is to be completed for all times worked outside rostered hours.

b) Average Weekly Hours:
   
   Weekly Hours = 178.5 hours over 8 weeks  
   (Neonates/wards/acutes)  
   Weekend Hours = 58 hours over 8 weeks  
   Afternoon shifts = 85 hours over 8 weeks  
   Nights = 73.5 hours over 8 weeks  
   Total: = 395hrs ÷ 8 weeks = 49.37hrs

[This is an ‘E’ category run. Shift rosters are raised up two categories as per NZRDA DHB MECA Clause 8.1.2, so this becomes a ‘C’ category run]

PAY CATEGORY C

(55.41hrs) (UNROSTERED HOURS = 4.06hrs)

(If and when House Officers work as relievers, they are paid at category ‘A’)

LEAVE:

Cover for leave is the responsibility of the employer. Any statutory holidays worked should be claimed for on a leave form so time may be credited to your leave entitlement.

Leave must be applied for in advance and will be requested prior to rosters being written
# APPENDIX 1

Prepared / Reviewed: January 2017
Senior Medical Officer (SMO) and Resident Medical Officers (RMOs)
Responsibilities and the Limits of Delegation of Responsibilities to RMOs

Contents
1. Purpose and Scope
2. Principles of delegated responsibility
3. When RMOs must contact the responsible SMO regarding patients they see or admit
4. Involvement of SMOs in ward referrals
5. Complex cases requiring input from multiple specialities
6. Patients in the Emergency Department and Emergency Department referrals
7. Audit
8. Associated Documents

1. Purpose and Scope
This policy outlines the responsibilities that a Senior Medical Officer (SMO) has for their patients and for referrals and what responsibility can be delegated to Resident Medical Officers (RMOs).

This policy also outlines when and how the SMO is to be contacted regarding a patient for whom they are the responsible SMO and for patients referred to them or their service.

This policy is deemed to apply to all RMOs unless there are specific instructions to the contrary in the department they are working.

2. Principles of delegated responsibility
The SMO is ultimately responsible for all patients seen or admitted by their RMOs and the SMO remains accountable for the decisions and actions of their RMOs.

RMOs work under delegated responsibility and have a professional responsibility to remain within their area of competence and to seek assistance from their SMO when required.

The SMO must ensure they are kept reasonably informed regarding the condition of their patients and must ensure they, or another SMO, are always available to give assistance to their RMOs.

Some SMO responsibilities cannot be delegated to RMOs. These include:

- Reviewing all new patients within 24 hours of admission.
- Reviewing all inpatients at least twice a week.
- Reviewing all High Dependency Unit (HDU) patients on a daily basis (or more frequently if clinically required).
- Reviewing patients on day 1 post major or emergency surgery.
- Reviewing and acknowledging histology results.
- Obtaining consent if the RMO is not competent to obtain it.
- Discussing complex cases with the coroner.
- Writing coroner’s reports unless the coroner has specifically requested a report from a RMO.
- Open disclosure of serious adverse events.
- Review of patients when a SMO opinion has been requested by another SMO.
- Responsibility for complex cases requiring multi-speciality input (see Section 5).
- Clinical handover of patient care when the responsible SMO is on leave or at conference.
Senior Medical Officer (SMO) and Resident Medical Officers (RMOs)
Responsibilities and the Limits of Delegation of Responsibilities to RMOs

3. RMOs must contact the responsible SMO regarding patients they see or admit in the following circumstances and SMOs must ensure that they are available to respond:

- Any patient who is seriously ill or sufficiently ill to require admission to the Intensive Care Unit (ICU), or HDU, or the Low Stimulus Area (LSA) in Mental Health.
- Any patient who requires acute transfer to another service or hospital.
- Any acutely ill patient transferred to Waikato Hospital.
- Any patient for whom the diagnosis or management is unclear; and for whom a delay of management until the next ward round would be inappropriate.
- Any patient who deteriorates unexpectedly.
- Any acutely unwell or unstable patient who requires more than a brief stay in the Resuscitation area in the Emergency Department (ED).
- Before making the decision to take a patient to theatre or for an invasive procedure.
- If requested by the nurse in charge of the ward at the time, or a clinical resource nurse.
- If a patient has a complication following a procedure with which the RMO is unfamiliar.
- To discuss all new admissions, referrals or patients discharged from ED at the end of their duty.
- Any unexpected death.
- Any death that may need to be reported to the coroner, before it is reported.

It is expected that all inpatients are seen each weekday by a RMO, and that the responsible SMO informed of any significant change in the patient’s condition.

On the weekend and out of hours, the on-call SMO is responsible for all inpatients admitted under their speciality or seen by their on-call RMOs. Every patient should have a weekend plan documented in the notes, and the on-call SMO should be informed of any deviation from that plan.

4. Involvement of SMOs in ward referrals

A ward referral is defined in this policy as one clinical team asking another clinical team to assess a patient on a ward and contribute to their inpatient management.

While many phone calls between RMOs regarding inpatients under another team are simply asking for general advice and are not actually referrals, even when providing advice, the RMO is still acting under delegated authority and the SMO should be informed if appropriate.

A RMO of the team receiving the referral should see the patient in a timeframe consistent with the clinical urgency, and then discuss the matter with their supervising SMO.

The SMO should be informed of any opinion their RMO has given, and decide if that is appropriate. The SMO will decide if they need to see the patient themselves.

The SMO initiating the referral should always be informed of the outcomes of the referral. Any urgent action that is required must be communicated verbally to the referring SMO/team.

Only a SMO can make a decision that a ward referral requested by a SMO is inappropriate. In this situation, the SMO of the team receiving the referral request should provide advice to the referring team; this could include an offer of an outpatient clinic appointment or other recommendation.

A direct SMO to SMO discussion is the best way to address any issues or in difficult cases.

The following must always be documented in the clinical notes by the referring team:

<table>

<td>26 July 2019</td>
<td>Clinical Services</td>
</tr>
</tbody>
</table>

Prepared / Reviewed: January 2017
Senior Medical Officer (SMO) and Resident Medical Officers (RMOs)
Responsibilities and the Limits of Delegation of Responsibilities to RMOs

- the name of the SMO making the referral
- the expectations that the referring SMO/team have of the SMO/team referred to,
- a summary of the clinical details, and
- the contact details of the referring doctor.

The team who respond must clearly document their opinion and answer any specific questions.

Any urgent action that is required must be communicated verbally to the referring SMO or team.

Disagreements between SMOs must be escalated immediately to their Clinical Directors (CD) and, if necessary, the Clinical Unit Leader (CUL), Service Head or Chief Medical Advisor (CMA).

5. **Complex cases requiring input from multiple specialities**

- Early SMO to SMO communication should be established to delineate the responsibilities and expectations of the different services involved in patient care. This cannot be delegated to RMOs.
- For ICU cases, the responsible ICU SMO will coordinate care.
- While a patient is in the ED Resuscitation, the ED SMO will coordinate care until there is an agreed designated team who will take primary responsibility. This should be agreed in a timely way.
- For trauma cases, the Trauma Director will coordinate care (see the Trauma Protocol).
- In non-trauma cases, it must be agreed which SMO and team will take primary responsibility and for what. The responsibilities of the other services should be agreed and understood.
- The SMO with the primary responsibility may change over time but must always be clear.
- If there is any disagreement over the most appropriate service and SMO to take primary responsibility, there should be a SMO to SMO discussion, if necessary escalated as noted above.
- For patients in the HDU, the SMO identified as the primary SMO responsible for the patient’s care is responsible for coordinating all care provided to that patient.
- The SMO primarily responsible for patient care should be documented in the patient’s clinical notes. This SMO is also responsible for coordinating all care provided to that patient.

6. **Patients in the Emergency Department and Emergency Department referrals**

Refer to the Speciality Referral Guidelines which outlines the responsibilities of RMOs referred patients by the ED and the need to immediately escalate issues to their SMO to deal with at the SMO to SMO level and if needed at a CD to CD, or CUL to CUL level or to the CMA.

7. **Audit Indicators**

Compliance with this Policy will be monitored by incident reporting and mortality reviews.

8. **Associated Documents**

Waikato DHB Specialty Referral Guidelines (5295)
Waikato DHB Trauma Protocol (1538)
Waikato DHB Electronic Results Acknowledgement: The responsibility of the Senior Medical Officer and the delegation of the responsibility to Resident Medical Officer (1452)
